

Cekhoax.id Widget

This is a widget that can be embedded into 3rd party website.

This structure provides those advantages:

- Small footprint and solid snippet on hosting website (see [usage](#))
- Multi-instance on the same page
- Isolation of code execution and CSS
- Customization via configuration injection and API to Widget
- Minimal dependencies and small size via single request (>30KB gzipped)

and a few more.

Usage

In order to embed the widget add the following snippet at any location on the hosting page:

```
<script>
  (function (w, d, s, o, f, js, fjs) {
    w[o] = w[o] || function () { (w[o].q = w[o].q || []).push(arguments) };
    js = d.createElement(s), fjs = d.getElementsByTagName(s)[0];
    js.id = o; js.src = f; js.async = 1; fjs.parentNode.insertBefore(js, fjs);
  })(window, document, 'script', 'aw1', 'https://search.cekhoax.id/widget.js');
  aw1('init');
</script>
```

the default position of floating button is on top right, you can also change the position of the button using param

```
<script>
  (function (w, d, s, o, f, js, fjs) {
    w[o] = w[o] || function () { (w[o].q = w[o].q || []).push(arguments) };
    js = d.createElement(s), fjs = d.getElementsByTagName(s)[0];
    js.id = o; js.src = f; js.async = 1; fjs.parentNode.insertBefore(js, fjs);
  })(window, document, 'script', 'aw1', 'https://search.cekhoax.id/widget.js');
  aw1('init', { styles: {classButton: 'bottom_right'} });
</script>
```

there is 4 option location for floating button:

- top right (default)
- top left (top_left)
- bottom left (bottom_left)
- bottom right (bottom_right)
